

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Feature: Adding Numbers to Tally

User Story 1: User clicks on the "+" button, given the Tally functionality works and the display is showing "0", when the user clicks on the "+" button, then the display should count up from 0 based off how many times the "+" button has been triggered.

User Story 2: User adds as many times as they want to, given the Tally functionality works and the display is showing "15" and the user clicks on the "+" button, then the display should show "15" and the "+" button should be disabled.

2. User story(ies) in Gherkin syntax for the "-" button.

Feature: Subtracting Numbers from Tally

User Story 1: User clicks on the "-" button, given the Tally functionality works and the display is showing any number between "1-15", when the user clicks on the "-" button, then the display should count down from the displayed number based off how many times the "-" button has been triggered.

User Story 2: User subtracts as many times as they want to, given the Tally functionality works and the display is showing "0" and the user clicks on the "-" button, then the display should show "0" and the "-" button should be disabled.
